ABSTRACT

The Project entitled “**ONLINE MENS-HUT**” is a form of Electronic Commerce in which the user sitting in front of a computer can access all the facilities of internet to buy or sell the products related to men and can also view photos or images of the products, along with the information about the product specifications, features and prices. The Payment mode for this system is cash on delivery, where the payment is made at the time of delivery rather than in advance. This system also provides a shopping cart for holding items selected for purchase. By this online shopping the product is directly delivered to customer home in which one can save their valuable time. This centralized system will ensure the activities in the context of adding, updating the products that can be managed effectively by admin and also making more accessible and convenient to user .
